MAY.

BY GEORGE W. SEARS.

The red-winged merle from bending spray,
With graceful pinions poising,
Pours out a liquid roundelay
In jubilant rejoicing:
The cock-grouse drums on sounding log,
The fox forsakes the cover,
The woodcock pipes from fen and bog,
From upland leas the plover.

The speckled trout darts up the stream
Beneath the rustic bridges,
White flocks of pigeons glance and gleam
O'er beech and maple ridges:
The golden robin trills his note
Among the mistle shadows,
The house-lark, with throat throat,
Makes musical the meadows.

The peeping frogs with silver bells,
In rhythmic cadence croon,
Ring out a chime of treble swells
In joyous gratulation:
The low of kine is mingling with
The song of lark and sparrow,
And fallow fields are growing blithe
Beneath the plow and harrow.

The moon all night, serene and white,
On lake and stream is glowing,
While rippling fountains seek her light,
Through woodland valley's flowing;
And all night long a low sweet song
Sweeps o'er the misty hollow,
From marsh and fen, from hill and glen,
From brook and field, and fallow.

It is the time of pleasant things,
When Love makes up his issues,
And hearts well up, like hidden springs,
From rusted cells and tissues—
A time to hear at break of day
A silver-chorus'd matin—
A liquid firework in croquet
On atmospheric satin.

A time to feast the soul, the eyes,
To watch each bird that passes,
And half-sunrise that glimmers wise,
And men are only asses,
And then to turn and raise the load,
With weary shoulders bending,
And take the old, well-beaten road
That leads—unto the ending.

Original Story.

Written for the Middletown Transcript.

MARION LESLIE,
OR
The Darkest Hour is Just Before Day.

It was a lovely morning in June of the
year 1854, that a young girl stood at the
window of an elegant mansion in Broad-
way, New York, with tearful eyes looking
upon the form of her recreating lover.
Marion Leslie (for such was her name)
was the only child of wealthy parents.
Her mother was a lovely woman who had
bestowed upon her daughter all the doting
tenderness of a mother's love. Her father,
stern and unrelenting, made every will
bow to his own. She had been reared in
the lap of luxury, and was sent at an ear-
ly age to a boarding school in the city of
B—.

She was at this time, a tall,
beautiful brunette of seventeen, and there
was something in the timid glance of her
black eyes, and in her general bearing,
which plainly showed that she was one of
those sensitive creatures who yearn for
love; and from many of her companions
she received it, for while at school she
formed ardent attachments, one of which
was with a young girl about her own age
who had never known the blessing of a
mother's love, having been bereft of her
tender care at an early age. The name of
this friend was Lillian Raymond, and with
her many of her leisure hours were spent.
She it was who sympathized with her in
all her sorrow and rejoiced with her in all
her joys. Lillian had an only brother
whose name was Clarence. He was tall
and stately, with sunny curls, sparkling
eyes, a high, intellectual forehead and a
mouth which expressed great determina-
tion, and anything he resolved to do, he
did, if it were possible, no matter at what
risk or expense.

In the city of B— was a college
which this young man attended, and
where he graduated with the highest hon-
ors, and then remained in the same city to
study law.

When returning to his boarding house
one evening, about dusk, he saw walking
before him two young ladies, evidently in
a great hurry. One of them he recog-
nized as his sister, and quickening his
pace he overtook her, and was introduced
to her friend, Marion, who was with her.
He accompanied them home, and left them
with the promise to call soon.

In about a week from this Clarence
Raymond again made his appearance at
the Seminary. He asked for Lillian and
Miss Leslie, but as Lillian was somewhat
indisposed, she declined going down, so
Marion went alone. They spent a very
agreeable evening together—he was
charmed by her gentle manners, and she
by his superior intelligence. He made an
engagement to call for her the next eve-
ning to take a walk with him by the river
side if she could gain the consent of her
teachers.

The next day he thought so much of
the contemplated walk that his studies
were in danger of suffering from neglect.
In the evening, at quite an early hour, as
Marion sat looking out of her window, she
saw Clarence walking up the street, and
in a few moments she was called and went
down to meet him, dressed for the walk.

It was a lovely evening; the moon
shone forth in all her resplendent bright-
ness, and the stars appeared one by one in
the heavenly arch. As Marion and Claren-
ce bent their steps to the river side, both
were silent. Clarence was the first to
speak:

"Miss Leslie," said he, "from the first
time I saw you, as the friend of my sister,
I thought a great deal of you, and ever
since my esteem has been deepening into
love, and this evening I feel constrained
to ask you a great question. In a few
weeks I shall leave this city, and perhaps
shall not see you again alone. It is this,
darling: in a few years may I claim you
as my bride?"

Marion remained silent for a moment,
and then said, "it is growing late, we
must be going."

"Will you not answer me?" he said;
"you must tell me before we part, if you
will be mine."

"To-morrow morning," said she, "I
will, after pondering the subject, send you
a note containing my answer."

They then parted; she to go into her
chamber to ponder over the event which
was to decide her destiny; and he to think
of his loved one.

She thought a long time, and at last sat
down to write.
In the meantime we will peep over her
shoulder. She begins, "Dear Clarence,
the reply which this note will bear to you
may decide the fate of two mortals. Yes,
Clarence, I will consent to be the bride of
one whom I love so dearly, and at the end
of three years you may claim me as your
own. Yours, truly, Marion Leslie."

The clock had sounded the hour of mid-
night ere Marion had completed this note,
and she retired with pleasant thoughts of
her loved one.

We will next take a glance into the
study of Clarence Raymond.

It is morning, and he is seated by a table
perusing the note written by Marion. As
he commenced reading, a look of
blended joy and sorrow passed over his
countenance, for he knew not what reply
it might contain; but as he finished it, a
smile of tenderness and gratitude lighted
up his face at the thought that the one to
whom he had given the best love of his
noble heart he should sometime call his own.

A month has passed and Clarence Ray-
mond has left the city of B—, and is
now in his own home in the country.
Marion, too, has returned to her home in
Broadway, New York, and this morning
we see her as she was the first time we be-
held her standing by her window, with
tearful eyes, looking upon the recreating
form of Clarence, who has been to see her
and has asked of her father her hand in
marriage. He disapproves of the engage-
ment and Marion has sought the solitude
of her own chamber to indulge her grief,
while Clarence retraces his steps to his
home, and sitting down he pens a note to
her, telling her that on the morrow he
should leave the city.

On the following morning Clarence set
sail for Europe. During the voyage a fe-
ver broke out on board the ship and Claren-
ce was one of the first to take it. For
several weeks he lay on the brink of eter-
nity, but even in his wildest ravings he
spoke of Marion. No gentle hand was
near to cool his burning brow, and the in-
valid suffered for the tender care of a wo-
man. Fortunately there was an eminent
physician on board the vessel, and by the
providence of God he recovered. In a
few days after he was able to go on deck.

When he arrived in France he wrote
Marion a long, loving letter, for she had
said, "I will ever feel, dear Clarence,
that I am yours even though my father
forbids our union," but alas! that letter
never reached Marion.

Years passed away, during which time
Marion had many suitors, one of whom
she accepted, thinking she would never
see or hear anything more from Clarence.

Preparations were being made for the
marriage of Marion Leslie and Harry
Danforth, who in three months were to
share the fortunes of life together. The
time passed swiftly by and the evening for
the wedding arrived. Marion came down
leaning on the arm of her betrothed. She
was dressed in a robe of flowing white
with a long veil falling carelessly over her
form. She entered the crowded room and
all was silent until the voice of the minis-
ter was heard, and when he asked if there
was any one present who knew any reason
why the marriage should not be consum-
mated, to speak then or forever after to
hold their peace, at voice was heard out-
side, and all eyes turned quickly toward
the door, and to the surprise of all, in
rushed Clarence Raymond. At sight of
him Marion gave a piercing shriek and
fell fainting in his arms.

The company dispersed, Marion recover-
ed consciousness, and mutual explana-
tions took place.

Harry Danforth, when matters were ex-
plained, like a true and noble man, gen-
erously released his betrothed from
vows, which he now felt would only have
resulted in unhappiness to her; and ere
many days, having gained the parental
consent, the union of two earnest, loving
hearts was celebrated, and we hope that
their future proved bright with the sun-
shine of love, with only a few clouds to
mar its beauty.

The credit system supports all the she-
riffs, constables, magistrates, judges, law-
yers and notaries, in the land; and cre-
ates more disturbance among men than all
other causes combined. And yet it is
tolerated.

The winds sweep, the waves wash,
the clouds weep, and the planets spin.—A
good housewife does all these.

What time is that which, spelt back-
ward or forward, is the same?—Noon.

CHIVALRY.

Chivalry or knighthood was an institu-
tion common to Europe during the middle
ages, having principally for its object the
correction of those evils peculiar to the
state of society which then existed. The
feudal system at that time prevailed, the
disorders flowing from which, connected
with the ignorance and barbarism of the
people, rendered some such institution as
chivalry necessary, provided a better could
not be found. Considered in this respect,
chivalry was co-existent with feudalism.

It was designed as a corrective of feudal
despotism, injustice and licentiousness. It
sought to support the weak, protect the
oppressed, to restrain the lawless, to refine
the rude, to avenge the wrongs, and espe-
cially to maintain the rights and defend the
purity of the female sex. In its elements
it combined bravery, honor, courtesy, love
and religion. Regarded in a military
light, we find it a part of the earliest con-
dition of most of the European world. Its
foundation, in fact, was the ancient char-
acter of Europe, and it grew into the form
and consistency which it at length assum-
ed, from the practices common among the
early Europeans, particularly the Germans,
of receiving their weapons in an assembly
of the nations, associating in clans, pro-
tecting and revering woman, and perform-
ing other acts of service when affection and
duty commanded them. The exact time
when these elements were framed into that
system of thought and action which we
call chivalry, it is impossible to tell.—

Knighthood was certainly a distinction of
society before the days of Charlemagne.
But it wanted religion. When it began
to be marked by religious rites, it formed
a regular institution. Its union with re-
ligion, took place somewhere between the
ninth and eleventh centuries. Its charac-
ter was raised and perfected by the Cru-
sades. Nearly the whole of Europe was
affected by the chivalrous spirit, but it
flourished most in France, Spain and Ger-
many, and more early developed itself as
a fixed principle of action, in these coun-
tries than in others. England, at length,
was imbued with it also.

There were three degrees in chivalry—
knights banners, knights, and esquires.
A soldier must have passed through the
ranks of esquire and knight, before he
could be classed with the knights banner-
ets. That high dignity could be possessed
only by a knight who had served for a
length of years in the wars, and with dis-
tinction, and who had a considerable retin-
ue of men-at-arms. The second and
most numerous class of chivalric heroes,
consisted of knights. A general qualifi-
cation for knighthood was noble or gentle
birth, which, in its widest signification,
expressed a state of dependence. The
third class of chivalry, the squirehood,
was composed of a body of efficient sol-
diers, inferior in rank to the knight, and
superior to the men-at-arms. Many of
them, on various accounts, remained in
this station during all their military car-
eer.

The education of a knight, in the fam-
ily of a feudal lord, generally commenced
at the age of seven or eight years. The
place of education was sometimes a school
appointed by the nobles of the country,
but most frequently the nobleman's own
castle, or that of some brother nobleman
served. The duties of the boy, for the
first seven years of his service, were chiefly
personal. He learned the dignity and
beauty of obedience, being made to feel it
a privilege to attend the lord and his lady
in the hall, and follow them in their ex-
ercises of war and pastime. The intellec-
tual and moral education of the boy was
given by the ladies of the court. From their
lips he learned his catechism, and his first
lessons in the arts of love. Religion, love
and war, were strangely combined in chi-
valry. Surrounded by noble females and
valorous cavaliers, the first impressions of
the future knight were on these subjects,
and he was taught to regard chivalry and
its honors, as the most noble object of
ambition. The military exercises of the
youth were not many, and they were im-
portant only as they were the earliest im-
pressions of his life. During the first seven
years, he was called a valet or page,—in the
old English ballads a child. At the age of
fourteen he received the title of armiger or
esquire; and though he was then author-
ized to carry arms, yet his personal do-
mestic service continued for some time.
His education was not completed till the
age of twenty-one. The esquire prepared
the refectory in the morning; and at din-
ner, he as well as the pages, attended at
the table and presented to the lord and his
guests the water used for washing. The
knight and the squire never sat at the
same table, not even in the case of father
and son, so strict was the principle of chi-
valry subordination. The full dignity of
knighthood was seldom conferred on a
squire before the age of twenty-one. The
ceremonies of inauguration were solemn:
The preparation consisted in prayer, con-
fession and fasting, and was accompanied
by clothing him with a white dress, which
was considered symbolical of the purity of
his new character; and by throwing over
him a red garment, which was to mark
his resolution to shed his blood in the
cause of heaven. These and other rites
were a necessary preliminary. A church
or hall of a castle was generally the place
of inauguration. The candidate first of-
fered his sword to the priest, who blessed
it. Before it was returned to him he took
his oaths of chivalry. The young warrior
having knelt with clasped hands before
the supreme lord in the assembly (a pure-
ly feudal ceremony) and having declared
that his only object is to maintain religion

and chivalry, was now invested with all
the exterior marks of the order. The
knights and ladies of the court attended
on him, and delivered to him the various
pieces of his harness. The armour varied
at different periods and in different coun-
tries, but some matters were of permanent
usage. The spurs were always put on
first, and the sword belted on last. Prin-
ces were exempted from the laborious offi-
ces of page and squire.

The horse of the cavalier was his pecu-
liar pride, and skill in the management of
the management of the animal was a dis-
tinction deemed worthy of every effort.
The knight bore about with him a variety
of weapons. The lance was the chief in-
strument of offence. His other offensive
weapons were a sword, dagger, battle-axe
and maces. His defensive armor was also
various. He had his shield, helmet with
its visor and heater, and body harness
made of plates of steel. A long flowing
robe, reaching down to the heels, consti-
tuted the dress of the knight.

Some of the defensive armour was so
constructed that it could be rolled up and
carried by the squire on horseback. It
was too rigid, heavy and cumbersome, to
be worn for a long time together, though
the knights were often subjected to that
inconvenience. When they were com-
pletely armed no weapon could reach the
body. It was not often that a knight
could be killed, except by being unhorsed.
In that event a thin dagger worn by each
assailant was employed. This could be
thrust into the body between the plates.

It is only in romance that we read of
swords cutting through that solid front of
iron by which a knight was protected; the
only way in which death could be inflicted
when he was mounted, was by thrusting
a lance through the small hole in the visor.
Such a mode of death was not very com-
mon, for the cavalier always bent his face
about to the saddle-bow when he charged.
He might, however, be unhorsed in the
shock of meeting. In that case, he was
at the mercy of the foe, who was in the
better condition. The horse of the knight
was defended by mail, or plate, agreeably
to the fashion of the age. His head, chest
and flanks, were either wholly or partially
protected, and sometimes, on occasions of
pompe, he was clad in complete steel.

In the character of a true knight were
combined many virtues and noble endow-
ments. It included, also, some prominent
defects. Companionship in arms, was a
sacred principle, and a knight would fly
to the relief of his companion in arms,
even were his services demanded by a lady
at the time. His valor was connected
with modesty, and both were in the high-
est degree conspicuous. In chivalry

Office corner Main and Scott streets.

Correspondence of the Middletown Transcript

NEWARK, May 3d, 1870.

As per announcement, on Saturday evening, April 30th, the citizens of Newark and vicinity assembled en masse in front of the Deer Park Hotel, to see and hear Senator Salisbury. At the proper hour, a committee consisting of A. Kerr and W. Dean, Esqrs., with the Citizens' Cornet Band, called upon the Senator and escorted him to the meeting. John W. Evans, Esq. chairman of former meeting, introduced the honorable Senator, who for an hour calmly and dispassionately presented to the people the issues of the day. His speech was replete with sound unanswerable argument in favor of the white man, and his supremacy over the negro and his equalizing allies. It was especially gratifying to see the ladies giving their countenance to the white man's movement. This is eminently proper, for all persons interested in the preservation of the white race, the women are especially so. What mother can but think with holy horror of the contaminating influence of daily association of her little innocents with the burly, dirty negro, in the common schools of our State, and to this the Radical course is daily tending. Summer, the lead-head of the negro equalizing pack, proclaimed in the Senate—"One thing more—the Common Schools must and shall be opened to all alike." At the close of the Senator's speech, Dr. S. Chandler, of Mill Creek, being loudly called for, arose and made a few pertinent remarks. The Citizens' Cornet Band enlivened the evening with some of their choice pieces. A. A. Laws arranged the hotel with lights and transparencies in a tasteful manner. The meeting was a decided success, and the white people went to their homes well satisfied with the prospect of coming victory. It is expected that Hon. D. W. Voorhees will be the next speaker of the course. More anon. S.

There is to be another national convention at St. Louis in October, in reference to the removal of the national capital. They will continue to hammer at it till it is accomplished.

The Augusta papers report the arrest of Norris, military sheriff of Warren county, Georgia, for receiving bribes from citizens. The arrest was made by the military.

The Red Stockings of Cincinnati beat the Green Stockings at Nashville, on Wednesday, 100 to 2.

Send your orders if you can't come.

april 9-y

A VALUABLE FARM

In St. Mary's County, Md.

AT PRIVATE SALE.

THE undersigned offers at private sale, his Farm in St. Mary's Co. Md., situated on the Patuxent river and running back to Cuckoo's Creek, a navigable inlet of the Patuxent, affording a water boundary on two sides, with facilities for shipping produce from either, containing

500 ACRES.

All the conveniences and luxuries, such as fish, oysters, crabs, and terrapin, readily available; a fine oyster bar extending along the river side, more than 100 yards from the dwelling. On the adjoining farm there is a wharf, where a steamer, three times a week, affords frequent communication with Baltimore. The projected line of the Southern Maryland R. R. is distant about 2 1/2 miles, one hour and 10 minutes, 10 miles, post office 2 1/2 miles, Catholic, Episcopal and Methodist Churches from 4 to 9 miles. The land is in good condition generally, the texture being principally loam and well adapted to the growth of the staple crops, wheat, corn, oats, grass and tobacco. Fields well supplied with water, some containing marl beds which have been worked in years past. The estate is at present divided into two farms, one containing 200 acres, the other on the creek. On the river farm the improvements consist of a

TWO-STORY DWELLING,

and all necessary out-buildings and outhouses, conveniences; large barn, cattle sheds, granary, corn and carriage houses, &c. There is a well in the stable-yard, a short distance from the dwelling, and several fine springs of water convenient. A good orchard of apple, peach and pear trees. The other farm having been tenanted out of late, is not so well provided as the home farm, but sufficiently so for tenant purposes. The wood sufficient for fire wood but very little for fueling purposes. The great water facilities and luxuries, the proximity to Baltimore, and the southern latitude so admirably adapted for early fruits and vegetables, render the above described property very desirable.

For further information apply to the Editor of the Middletown Transcript, or to the subscriber, P. C. NEALE.

A FEW THOUSAND

No. 1, Peach Trees!!

Of the following varieties left for sale, if applied for early, at

Middletown Nurseries.

EARLY YORK,

CRAWFORD'S EARLY,

MOORE'S FAVORITE,

REEVES' FAVORITE,

OLD MIXON,

HARKER SEEDLING.

I also have left a good lot of

SECOND SIZE,

Well-rooted, of all varieties, which I will close out cheap. Many experienced Peach Growers say that second size trees, if well rooted, make as good trees and bear as soon as first size.

This is a rare chance to get a good orchard for very little money. It is thought peach trees will be high next season.

USE THE

"AVERILL CHEMICAL PAINT,"

All Colors,

For Painting Dwellings and all kinds of Buildings, both inside and out. Prepared for

Immediate Application,

AND REQUIRING

No Oil, Thinner, or Dryer.

THE PUREST WHITE,

AND OVER

Twenty-Five Different Shades!!!

It is more Beautiful, more Durable, and Costs much Less than Lead and Oil, or any other paint. There being

NO MIXING REQUIRED,

Every person can be

HIS OWN PAINTER,

Without the fear of not having paints properly mixed. It is Water-Proof and Elastic, and dries quickly, with a hard, rich and glossy surface that is warranted not to crack or peel off, and to retain its bright color, and to last longer than the best Lead. The amount saved in the cost of the paint is 25 per cent. on the cost of Lead and Oil, saying nothing about the expense of Dryers, Colors, and Mixing required in using Lead.

In offering this Paint to our customers, and the public generally, we feel justified in asserting that it is the best, most simple, and most durable and economical paint now in use, and we warrant it to be what it is represented, or refund the money expended in purchasing it.

TRY IT.

Select Poetry.

WHILE WE MEET UPON THE LEVEL.

BY EMMA ALICE BROWN.

'Tis the zenith hour of darkness—
Hark, the warning midnight bell!
Ere the lights fade on the altar,
Let our solemn hymns of parting
Sweet thanksgiving swell!

Met for labor and refreshment,
Brothers of the Mystic Rite,
For the goodly gifts that crown us,
Humbly be our hearts uplifted
To the giver of all light!

By the plumb-line of His Justice,
And by Virtue's Jeweled Square,
May we test our every action,
And from earthly stain and blemish
Keep our garments white and fair!

Circumscribe each wayward passion,
By the compass of His Love!
Truth, Relief, and Love Fraternal,
While we meet upon the Level
Guide our stumbling footsteps still.

When temptations rude assail us,
Thralled by treachery's subtle snare,
Menaced by the storms of sorrow,
All the waves of earth and air,
He will hide us from despair.

Taking from our high example,
That our lives may blossom as the rose,
Him whose glorious name and record—
"Faithful unto death"—is written
In the bright Archives Above.

Gladly when the chilling winter
Of the grave is drawing near,
When its icy winds sigh around us,
And its cold dew galls our foreheads,
We the Master's call shall hear—

We shall hear the awful summons
Echoing in the vaulted night,
And with joy our Lord obeying,
By the token and the pass-word
Enter Everlasting Light!

There on the All-glorious Temple,
In that house not made with hands,
Fitted by the mighty Builder
Unto perfect Strength and Beauty,
Linked in Love's eternal bands.

Sweetly we shall dwell together,
While the cycles roll and shine,
Children of all climes and ages,
At the right hand of the Warden,
Gathered to the Lodge Divine!

Fadeless as the bright Aetia,
May our deeds immortal bloom:
While beneath her mystic garlands,
Folded by His peace, our ashes
Slumber in the silent tomb.

Our Ollo.

"BONNIE ANNIE LAURIE."

Almost every one is familiar with the sweet song of "Annie Laurie," though it may not be generally known that the famed maiden was not a creature of imagination but an actual verity of whose ancestry honorable mention is made in Scottish history.

Stephen Laurie was a flourishing Dumfriesshire merchant before James VI. became King. Prior to 1611, he married Marion, daughter of Provost Coran—getting with her a handsome marriage portion. His wealth enabled him to purchase of Sir Robert Gordon of Lochiavar, Bithought, Shail Castle and Maxwellton whose "braces are bonnie." Stephen Laurie, then a man of many acres, took the designation of Maxwellton, leaving, at his death, his lands and titles to his eldest son, John.

The next heir of the house was Robert, a baronet. He was twice married, and had, by his second wife, three sons and four daughters. The birth of one of the latter is thus entered in the family register by her father: "As the pleasure of Almighty God, my daughter, Annie Laurie, was born upon the 16th day of December, 1682 years, about six o'clock in the morning, and was baptized by Mr. Geo. Hauger." (minister of Glenclaver).

This minute is worth quoting, as the little stranger, whose entry in life it announces, grew to be the most beautiful Dumfriesshire lady of the day, and the heroine of a song which has rendered her charms immortal:

"Her brow is like the snow drift,
Her throat is like the swan,
Her face it is the fairest
That e'er the sun shown on—
That e'er the sun shown on—
And dark blue is her eye,
For her name is Annie Laurie,
I'd lay me down and die."

The well-known lyric, of which these lines form a part, was composed by Mr. Douglas Finlay, an ardent admirer of "Bonnie Annie," who did not, however, return his affection, but married his rival, Alexander Fergusson.

THE PEACH BORER.—A correspondent furnishes the Columbia Spy with the following article on the peach borer: "The greatest enemy of the peach tree, is the White Worm or Borer. It is well known that the fly producing the worm lays its egg in the trunk of the tree just below the surface of the ground. In a short time the egg is hatched and destruction begins. Many remedies have been tried to get rid of the pest, but with such small success that most people have abandoned all hope of a cure except that of the knife and wire, which is almost as bad as the disease, lamentably wounding and disfiguring the tree.

It is an old "saw" that an "ounce of preventative is worth a pound of cure," and here is the secret of prevention for nothing.

When you plant your trees, or if you have trees already growing, thoroughly cleanse them of worms and then box them in from say three inches below the surface to nine or ten inches above. Cover the top of the box with a piece of the thinnest muslin, to let in the light and keep out the "varmints." Drive a small nail into a side of the box near the top, to which attach a small piece of wire. In the latter part of July take off this cap, slip the box up the trunk and hang the wire over a limb; and in the latter part of next April place the box again in position."

FARMERS AND HORSEMEN!!!

THE THOROUGHbred STALLION JOE HOLT

Will stand for March, the ensuing season at Middletown, and Mr. Anthony Reynolds, commencing the first week in April at Middletown, alternate weeks at Mr. Anthony Reynolds. Those wishing to improve their stock, would do well to see Joe before cutting themselves elsewhere.

Money received on deposit and returned on demand with interest. Parties keeping accounts with us may draw checks on us payable at sight, precisely as in the case of banks.

Drafts on England, Ireland, Germany and other countries drawn.

Parties desiring to invest money in bond and mortgage, are invited to examine our list of securities of this class.

Passage tickets from Europe, by all good lines sold.

Government Securities taken in exchange for any other securities at the highest market rates.

JOHN MCLEARN & SON.

June 5th, 1860-4f.

REGISTER'S ORDER.—REGISTER'S OFFICE,

New Castle Co. Feb. 24, 1870.

Upon the application of J. RANDOLPH HOLTON, Administrator of the Estate of J. Randolph Holton, late of St. George Hundred in said county, deceased; it is ordered and directed by the Register that the administrator aforesaid, give notice of the granting of Letters of Administration upon the Estate of the deceased, with the date of granting thereof, by causing advertisements to be posted therein forty days from the date of such Letters, in six of the most public places of the County of New Castle, requiring all persons having demands against the Estate, to present the same or abide by an Act of Assembly in such case made and provided. And also cause the same to be inserted within the same period in the Middletown Transcript, a newspaper published in Middletown, and to be continued therein two months.

Given under the hand and Seal of J. S. Office of the Register aforesaid, in New Castle county aforesaid, the day and year above written. B. GIBBS, Register.

NOTICE.—All persons having claims against the Estate of the deceased must present the same duly attested to the Administrator, on or before February 24th, 1871, or abide the act of Assembly in such case made and provided.

J. RANDOLPH HOLTON, Administrator, March 5-2m Address—Middletown, Del.

PROMPT, ACTIVE, RELIABLE.

A Great Crop Producer and Thorough Renovator of worn out lands.

For Sale by E. T. EVANS, Middletown, Del.

Middletown, Del. Feb. 28, 1868.

MESSRS. WALTON, WHANN & CO.—Gentlemen: I used Whann's Raw Bone Super-Phosphate on my corn last spring, and on my wheat in the fall.

In each case it produced an excellent crop. Wishing to determine which of the different phosphates would pay me best, I tried several, and am glad to say the yield was much the best where I used Whann's. I shall continue to use it, and cheerfully recommend it to my neighbors.

A. T. STOOFS, Middletown, Del. March 27-1y
